By this document it will be confirmed that the following JTAG devices, the listed pins, nets and included components are being affected by the previously generated SVF files which could be played by a programmer of ProMik GmbH in separate way by using the SVF Player software for determining missmatches at the boundary scan chain

1 JTAG device: IC41000: S32G275A

The previously generated SVF files are covering for the JTGA device IC41000: S32G275A totally 349 different pins, 206 different nets and 186 different connected components

1.1 Pin overview

All covered pins
