By this document it will be confirmed that the following JTAG devices, the listed pins, nets and included components are being affected by the previously generated SVF files which could be played by a programmer of ProMik GmbH in separate way by using the SVF Player software for determining mismatches at the boundary scan chain

1 JTAG device: U201

The previously generated SVF files are covering for the JTGA device U201 totally 298 different pins, 150 different nets and 94 different connected components
