By this document it will be confirmed that the following JTAG devices, the listed pins, nets and included components are being affected by the previously generated SVF files which could be played by a programmer of ProMik GmbH in separate way by using the SVF Player software for determining mismatches at the boundary scan chain

1 JTAG device: s32k142

The previously generated SVF files are covering for the JTAG device s32k142 totally 66 different pins, 66 different nets and 100 different connected components
